

ULTRAVIS

PRODUCT NAME

ULTRAVIS

RECOMMENDED USE

A new high-tech liquid polymer viscosifier and fluid loss control product.

PRODUCT DESCRIPTION

ULTRAVIS is used for the diamond, horizontal, rotary or seismic drilling applications.

ULTRAVIS is a highly concentrated product that rapidly develops into a very high viscosity fluid when mixed with water.

ULTRAVIS provides viscosity yields 40-50% greater than conventional liquid polymers, and can be used in fresh or brine water.

ULTRAVIS is an excellent inhibitor against shales, clays, fractured zones, sand and blocky formations, and contaminants.

ULTRAVIS is resistant to viscosity change under high water temperature conditions.

ULTRAVIS has superior shear resistant properties.

SUGGESTED DOSAGE

Dependant on water and drilling conditions, however up to 50% less ULTRAVIS will be required than conventional products.
